

## Weight Piece (2018)

—

Fv 1: Play your instrument and then get tied up by your colleagues. The piece ends when you can no longer play, or when you have been placed in a final position. (It's better not to play anything with personality, so the obstructions can be heard more easily)

Fv 2: The original plan for this piece was to play viola with weights attached to arms, bow, etc. I still like the idea of trying this.
